

Technical Description

Description	Function	Component
Adaptor	Transfer AC output from 120V into 12V	
EMI Filter	Suppression of emissions	L1, C1, C2
Bridge Rectifier	Provide smooth DC	D1~D4,C4
LC Syntonic circuit	Generate 12.8KHz high frequency voltage to drive the lamp	R1, R2, C5, L2, Q1, Q2, B (high voltage transformer)
